

TEKCAST – For Training and Technical Support “Spin Casting is our Specialty!”

Learn from the experts! With over 35 years of Spin Casting experience, TEKCAST offers a variety of specialized training programs and detailed instructional materials to provide the best and most comprehensive approach to learning Mold Making and Spin Casting.

FREE - with each complete TEKCAST Equipment System Package:

Our Special Training Materials package is “Free of Charge” with each complete TEKCAST Equipment system purchased. It includes the following Comprehensive 4 point TEKCAST Training Approach:

1.) TECHNOLOGY TRAINING AND OPERATION MANUALS – This easy to follow comprehensive set includes four [4] separate manuals (\$95.00 value) which cover the complete technology of mold-making and spin-casting. Learn techniques for both metal and plastic casting from "A-Z"; Topics include: mold-making, casting, plastic and metal alloy selection, equipment installation, and detailed operation and preventative maintenance .

2.) 5 HOUR TRAINING DVD WITH TUTORIAL TRAINING MOLD SET – Our unique training approach includes both a 5 hour Comprehensive Training Video Program (\$1,050 value) on DVD format and a fully gated and vented Tutorial Training Mold with actual cast parts. Learn step-by-step the basics of mold-making and casting by using the cast parts provided with your instructional set to re-create the same mold shown in your training DVD. *The 9 unique cast parts are specifically chosen to provide the student with valuable hands-on working experience on a variety of mold-making and casting techniques. This is a TEKCAST exclusive and is only available directly from TEKCAST.* You learn at your own pace and can easily review specific concepts for greater depth of understanding. This unique approach is described in detail on the “link” below from our website:

[TEKCAST Instructional Materials](#)

3.) HANDS–ON-TRAINING – Two [2] days of direct Hands-On Training with an Experienced Dedicated TEKCAST Instructor is provided here at our New Rochelle, NY USA Headquarters and Training Center. Classes include hands-on work and discussion time. If requested, additional training days are available at TEKCAST on a technical consulting, fee paid basis.

4.) WORLD CLASS TECHNICAL SUPPORT – only a phone call or Email away. As a TEKCAST customer, our technical staff is always available AT ALL TIMES by phone or email to answer your technical questions or help solve operational problems.

OF IMPORTANT CONSIDERATION – *Because of the process simplicity and the comprehensive instruction options provided, over 90% of our new customers get completely set-up and quickly begin operating the equipment and technology...totally on their own (moving rapidly into full scale production within a short period of time) without the need for any Direct Hands-On Training from TEKCAST personnel.*

TEKCAST'S SPECIALIZED "OPTIONAL" TRAINING SERVICES Customized For Your Requirements:

The following custom options are available on a consulting fee paid basis; additional charges will be billed for time and materials used.

A.) ON-SITE TRAINING OPTION – Learn from our experts. Direct Hands-On Training from a dedicated TEKCAST instructor can also be conducted at any time in your own TEKCAST workshop/facility for minimum period of 5 days [2 days are at no charge with a new Complete System purchase]. This would be billed on a technical consulting fee paid basis with additional charges for traveling costs and instructor's per diem expenses.

B.) ON-GOING MOLD-MAKING SERVICE – fully operating molds [sample or multi-cavity production] can also be prepared for our customers using the parts/models/patterns they provide. This is done at a nominal charge based on the actual costs for time and materials we consume on the project.

C.) START-UP-MOLDS – This valuable initial mold-making service is available to help our customers get set-up and into production in the shortest amount of time. You benefit from our knowledge and experience and learn the technology more rapidly by having TEKCAST make you're your first production ready molds. At our customer's request, we can prepare fully operating molds that incorporate the models/parts provided by our customers. The completed ready-to-cast molds can be sent along with your initial system order shipment.

Your staff will easily be able follow the documented operating instructions included on all Start-Up-Molds and immediately put these molds into use for your own initial production requirements. In addition, these specially prepared molds are invaluable to study and learn with, noting the manner of layout; and gating and venting techniques used. Your custom Start-Up-Molds can later be utilized as a guide to duplicate additional molds on your own. This service is done at a nominal charge, based upon the actual costs for time and materials consumed on the project.

Our goal is to provide you with the best, most complete technology and training experience available. TEKCAST is the only company in this industry that provides our customers with a wide variety of in-depth Free Training Materials and Services, as well as, our unique Specialized Training Options to suit your own individual requirements.
